

DISCLAIMER: All data and information contained herein are provided for informational purposes only without warranty of any kind (express or implied), including, but not limited to, any warranties of accuracy or completeness. All such data and information is preliminary, and thus, is subject to change, update and/or refinement. The District makes no representation or warranty that the information provided herein is correct, sufficient, complete or accurate. Any and all parties participating in the procurement process shall evaluate and validate any design criteria, requirements and/or other data and information provided by the District. Without exception, Respondents shall be responsible for the interpretation of all data and information provided. The District specifically disclaims responsibility or liability for any of a Respondent's interpretations and/or assumptions in developing a Proposal.

The posting of this data and information does not commit the District to issue an RFP or award a contract, nor does it commit the District to pay any cost incurred in the preparation and/or submission of a Proposal or in making necessary studies or designs for the preparation thereof. The District assumes no obligations, responsibilities, and/or liabilities, fiscal or otherwise, to reimburse all or any part of the costs incurred or alleged to have been incurred by parties participating in the procurement process or considering a response to and/or responding to an RFP. All such costs shall be borne solely by each Respondent and its team members.

The District reserves and retains all rights and conditions set forth in the RFQ (including, but not limited to, those set forth in Section 7.4 of the RFQ). By viewing the data and information contained herein, any party participating in the procurement process acknowledges and consents to the following District rights and conditions, including without limitation, with or without cause and with or without notice, the right to: (a) modify the procurement schedule; (b) suspend or terminate the procurement process for any reason whatsoever; (c) cancel, withdraw, postpone or extend any RFP, in whole or in part, at any time, without incurring any obligations or liabilities; (d) correct, amend, withdraw, supplement and/or otherwise modify data and information and any RFP issued; (e) decide not to award a DB Contract as a result of the procurement process, for any reason; (f) at any time prior to execution of the DB Contract, amend the contract services, omit services therein, or include services not currently contemplated therein; and (g) take any and all action affecting the RFP process, or the Project that is determined to be in the District's best interest.

Freyer Lauretta
Attn: Sean Chou

Subject: Sandhill (THERE ARE NO OTHER UNDERGROUND FACILITIES OTHER THAN WHAT IS SHOWN ON MAPS)

Dear Sean,

AT&T has reviewed the plan map for the project mentioned above. We have determined that we **do have** existing underground facilities within the project limits as shown on the attached drawings.

It is your responsibility to review the attached drawings to determine whether or not our facilities conflict with your project. If you determine that a conflict exists, please notify AT&T in writing of the need to relocate its facilities well in advance of the commencement of the Project. If manhole or box adjustments are required, you must fax a letter of request 30 days in advance. My fax number is 408-945-1247.

The drawings indicate the approximate location of our existing facilities in the field. Please contact **UNDERGROUND SERVICE ALERT** on **1-800-227-2600** prior to any excavation work in these areas.

If you have further questions or concerns regarding this information, please call AT&T's Right of Way Manager, Bruno Czech at 408-635-8881.

Sincerely,
Vickie Brugge
Engineer Admin
408-635-8767
VB2932@att.com

Ref: 1719

Regarding as-builds, please be advised that all maps supplied are for reference purpose only. Maps only indicate approximate conduit routes and box/manhole locations. The maps **do not** indicate conduit size, type, overall structure size or depths of structure and **do not** guarantee exact location of underground facilities.

AT&T facilities may or may not be in conflict with your project. In order to determine this, AT&T facilities must be positive potholed for exact location and depths. This function is the responsibility of the requestor.

If a conflict is discovered, immediate coordination with AT&T must be made to determine what course of action can be taken to resolve said conflict. Please be advised that some resolutions may take several months to resolve. Furthermore, a conflict found during construction which should have been determined during the design stage could severely delay your project and the requestor of said records may be responsible for all cost incurred to resolve conflict.

AT&T does not maintain nor supply records for aerial facilities, facilities on private property and/or individual service conduits.

Prior to any construction activity, please call U.S.A. (Underground Service Alert) on 811, two working days in advance.

Maps/information supplied is Proprietary Information and is not for use or disclosure outside your firm and/or AT&T/SBC/Pacific Bell/Nevada Bell except under written agreement.

Dear Customer,

PLEASE NOTE THE FOLLOWING INFORMATION:

Enclosed is the **Gas and/or Electric** information you requested within the subject area. **Please use these maps to confirm the location of PG&E facilities shown on your plans.**

These electronic files contain information that is proprietary and/or confidential information of Pacific Gas and Electric Company and is **intended for use only by authorized persons**. Unless specifically authorized to do so, do not make copies of these files, or distribute it to anyone other than persons authorized to use these files.

Before you start any trenching on your project, please call **Underground Service Alert (USA) at 811** at least 48 hours prior to any excavation, to have your work area marked for underground facilities. Call USA (811) to obtain exact location of facilities and pot-hole to verify depth of our lines (if required). Please note that a standby PG&E employee is required during any excavation within **10 feet of a gas transmission line**.

If you discover a conflict or if you determine our facilities need to be lowered/raised, please contact your PG&E Representative, file an application online at www.pge.com/customerconnections, or call 877-743-7782.

PG&E does not provide depth information about our existing electric and gas facilities (i.e gas main and services, etc). Underground facilities are **generally** 24" to 36" deep. However, the depths may have changed due to street reconstruction and general area changes. If, after receiving our maps, you determine depth information is needed to better plan future street improvements, you should pothole or take appropriate action as needed.

PLEASE CALL U.S.A. AT
LEAST 48 HOURS PRIOR TO
EXCAVATING IN THIS AREA
Dial 811

THIS MAP IS FOR THE EXCLUSIVE USE OF
Freyer & Laureta, Inc
ONLY. IT IS NOT TO BE REPRODUCED AND
DISTRIBUTED TO OTHERS WITHOUT
WRITTEN PERMISSION FROM PG&E

Dear Customer,

PLEASE NOTE THE FOLLOWING INFORMATION:

Enclosed is the **Gas and/or Electric** information you requested within the subject area. **Please use these maps to confirm the location of PG&E facilities shown on your plans.**

These electronic files contain information that is proprietary and/or confidential information of Pacific Gas and Electric Company and is **intended for use only by authorized persons**. Unless specifically authorized to do so, do not make copies of these files, or distribute it to anyone other than persons authorized to use these files.

Before you start any trenching on your project, please call **Underground Service Alert (USA) at 811** at least 48 hours prior to any excavation, to have your work area marked for underground facilities. Call USA (811) to obtain exact location of facilities and pot-hole to verify depth of our lines (if required). Please note that a standby PG&E employee is required during any excavation within **10 feet of a gas transmission line**.

If you discover a conflict or if you determine our facilities need to be lowered/raised, please contact your PG&E Representative, file an application online at www.pge.com/customerconnections, or call 877-743-7782.

PG&E does not provide depth information about our existing electric and gas facilities (i.e gas main and services, etc). Underground facilities are **generally** 24" to 36" deep. However, the depths may have changed due to street reconstruction and general area changes. If, after receiving our maps, you determine depth information is needed to better plan future street improvements, you should pothole or take appropriate action as needed.

Subject: Utility Information Request for Bay Division Pipelines
No.3 & No.4 in Menlo Park

Dear Mr. Murray,

In response to your letter received July 22, 2016 requesting for utility information within the proposed project area, I am attaching a copy of drawing E-2329-1 showing the location of SFPUC's 72" Bay Division Pipeline No.3 and 84" Bay Division Pipeline No.4 on our pipeline rights-of-way. The drawing showing SFPUC pipeline size and approximate location are for your reference only. **Exact location and depth of pipelines must be verified by potholing.**

If you need to work within the SFPUC rights-of-way, Please apply for a revocable permit or consent from Ms. Stacie Feng at (650) 871-2037.

Sincerely,

Jonathan Chow, P.E.
