What Can I Do?

Sewer spills pollute creeks and streams that flow to the San Francisco Bay and have harmful effects on local marine life. Following these steps will help prevent sewer backups and spills:

Siguiendo estos pasos usted nos ayudara a prevenir obstrucciones de desagüe y derrames.

1. Pour cooled fats, oils and grease into a covered, disposable container and throw it into your yard waste/organics cart. Never pour fats, oil, or grease down sink drains or toilet.

Una vez frio, coloque la grasa y/o el aceite en un contenedor desechable con tapa y arrójelos a la basura. Nunca deseche grasa o aceite en los drenajes de su casa.

2. Soak up spilled oils and grease with an absorbent material such as paper towels or kitty litter and discard as solid waste. Do not use the garbage disposal.

Absorba las grasas y los aceites restantes con un material absorbente como servilletas de papel y tirelos a la basura.

3. Before you wash dishes, place food scraps, fats, oils and grease into your yard waste/organics cart. Do not use the garbage disposal.

Antes de lavar los platos, tire los restos de alimentos, grasas y aceites en la basura.

4. Use sink strainers to catch any remaining food waste while washing dishes and dispose of in your yard waste/organics cart.

Utilice coladores para fregaderos al lavar los platos para atrapar los residuos de la comida al lavarlos.
